<b>Category:</b>			
<b>Target version:</b>	aosp-any		
<b>Device:</b>	espresso, espresso3g		
<b>Description</b>			
I don't know if this is related to the newer kernel (3.4 instead of 3.0) but I just tried the latest Android 7.1.1 build for espressowifi and espresso3g and USB OTG support doesn't work, i.e. nothing happens when attaching a mouse, keyboard or USB flash drive.			

#### History

---

**#1 - 03/16/2017 08:37 PM - André Pinela**

- Status changed from New to Feedback
- Assignee set to Dániel Járai
- Priority changed from Normal to High

**#2 - 11/05/2017 02:16 PM - Andreas Blaesius**

- Subject changed from OTG support not working to espresso/espresso3g: OTG support not working
- Description updated

We switched to a 3.0 kernel now, please let me know if the issue still exist.
